PERSONAL PROJECT

Front-end Developer— *Imdb (Clone)*

Jharkhand   May 2023 - Present

- Movie Details: Display comprehensive information about a selected movie, such as title, release year, duration, rating, plot summary. Retrieve this data from the API and present it in a user-friendly format.
- Top Rated/Popular Movies: Fetch a list of top-rated or popular movies from the API and showcase them to users. Users can browse through the list, view details, and potentially filter the results based on various criteria.
- User Ratings and Reviews: Enable users to rate and review movies, similar to IMDb's rating system. Store user ratings and reviews in your own database and display them alongside movie details.

Developer–*Text processing project*

Jharkhand • July 2022 — August 2022

1. Input and Output:
- Read text from a file: Read text data from a file or receive user input.
- Write text to a file: Save processed text or results to a file.

2.Case Conversion / Stopword Removal:

- Converting text to uppercase or lowercase.
- Removing common words that do not contribute much to the meaning of the text.

3.Frequency:

- Counting the occurrence of each word / space in the text file.
- Counting the line used in the text file.
